

TURBO BOOST SYSTEM

SHREDDING CAPACITY

TURBO BOOST

This patented design is an exclusive feature now available on select KOBRA shredder models. A specially designed electronic control module allows the operation of the paper shredder in two different modes:

Standard Mode:

The paper shredder operates according to its standard features and rating for normal operation.

Turbo Boost Mode:

By pressing the Turbo button located on the top cover, the cutting capacity of the machine is temporarily increased by 30%. In case of a paper jam, the Turbo Boost is all you need to clear it. No more messy paper particles on the floor. No more clean-ups after a paper jam. The jam will feed right through the cutting mechanism and into the waste bin. The bright Turbo light indicates reactivation of the Turbo Boost after each use. KOBRA "Turbo Boost" shredders feature unbelievable shredding power—up to 50 sheets of paper in one pass.
