A PROFESSIONAL MACHINE FOR A PROFESSIONAL ENVIRONMENT: MARQUIS iFOLD 100

Extremely quiet, precise, fast, reliable, compact and user friendly

The compact, professional folder that delivers unrivaled performance.

The **Marquis iFold 100** offers unlimited versatility, with the large variety of folds that it can perform. No matter which type of fold you choose, it is delivered accurately and reliably. Your mail, inserted through the daily mail input, will appear professionally prepared.

The **Marquis iFold 100** is a continuous duty folder, requiring no times of cool-down or inactivity, thus increasing productivity and reliability. This is unlike its rivals that require time consuming periods of rest due to impractical duty cycles. Further strengthening the iFold 100 are its roller bearings, as opposed to the short life cycle, plastic bushings used by its competition. For durability and unparalleled execution, there simply is no other choice.

The **Marquis iFold 100** can process a large variety of paper weights and surfaces without any adjustment. Its standard counter and pre-counter make keeping track of a large volume folding applications easy. This prevents wasteful paper use and ensures the precise count of folded documents. Further, removable in-feed rollers and separation pads make costly repairs non-existent, as they can be changed by the operator in mere seconds. The practicality of this high-volume folder is unsurpassed.

The **Marquis iFold 100** is the perfect addition to your professional work environment. With its beautifully designed housing, it can be placed anywhere in your office, rather than necessitating special positioning

at the edge of a desk, as required by much of its competition. Its special "internal folding pockets" reduce noise drastically and the iFold 100 does not produce the harsh noises of so many folding machines with external folding trays.

Unpack, plug & fold: Marquis iFold 100 is ready to use.

This versatile, quiet and reliable folder makes it suitable for a variety of folding applications. Its compact size offers a tremendous amount of features such as:

- Quick and fine adjustment of the folding plates.
- Electronic Counter
- Electronic Pre-Counter to preset an exact number of documents to fold.
- Paper End Control
- Removable Paper Tray
- Standard Anti-Static Mechanism (Option on most folders)
- Exchangeable Feed Roller
- Exchangeable Separation Pad
- Daily Mail Input
- IDS – Internal Diagnostic Software
- Quiet, Internal Folding Pockets

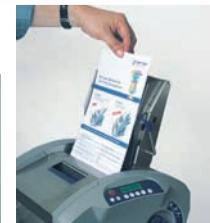

After one use, this machine will exceed the expectations of the most demanding user.
