# IN A CLASS OF ITS OWN: THREE PAPER CASSETTES MARQUIS iFOLD300

**Quiet, Precise, Fast, Reliable and User Friendly**

**The Marquis iFold 300: Folding with three paper cassettes.**

The **Marquis iFold 300** is the only desktop folding machine in its class that can collect up to three sheets and fold them at once. These three feeding stations can be combined or used individually, allowing paper from each of the trays to be folded to the preference of the user.

The **Marquis iFold 300** is equipped with a collating function. This feature selects one sheet of paper from each cassette and folds them together, producing a collated, folded document. Further enhancing the iFold 300's practicality is its continuous operation paper capacity. Simply put, the machine can be programmed so that, as one feeder empties, it will take paper from the second feeder and the third. And even while this process continues, the user can refill the iFold's empty cassettes. This feature combined with a standard electronic counter and pre-counter make this model perfect for the most demanding work environment.

The **Marquis iFold 300** was designed with practicality, functionality and efficiency in mind. This model can process a large variety of paper weights and surfaces, without limiting the user to standard twenty pound bond. A daily mail input, with a 5 Sheet capacity is also standard on the iFold300. All of these functions are performed with little noise production. This is achieved via the internal folding pockets which virtually eliminate noise. This is unlike competition, which expose their users to loud, harsh noise pollution, due to their external folding pockets, making them impractical for office use.

The **Marquis iFold 300** not only out performs its competition with its standard features, but its build-quality and construction as well. Unlike its competition that utilize plastic bushings in their construction, the iFold 300 uses only steel bearings. Also unique to an extremely durable folding machine is its continuous duty performance. This allows the machine to be used constantly, without time consuming periods of rest and inactivity. With unparalleled features, build-quality and reliability, the **Marquis iFold 300** is the choice of the business professional.

**Unpack, plug & fold: Marquis iFold 300 is ready to use.**

With first in-class features, unrivalled construction and practical, noise-free operation, the **Marquis iFold 300** is perfectly suited for a demanding work environment. It comes standard with extraordinary technical features:

- Three Paper Cassettes
- Collating Function
- Quick and fine adjustment of the folding plates
- IDS – Internal Diagnostic Software
- Electronic Counter
- Electronic Pre-Counter to pre-set an exact number of documents to fold
- Paper End Control
- Standard Anti-Static Equipment (Option on most folders)
- Removable Paper Tray
- Exchangeable Feed Roller
- Exchangeable Separation Pad
- Daily Mail Input
- Quiet, Internal Folding Pockets

**After one use, this machine will exceed the expectations of the most demanding user.**

Display with electronic counter and pre-counter
