

New Features for the PLUS C-12 Series CaptureBoards

Enhanced Security

To accommodate customers who desire to keep proprietary information from being accessed when the board is used in a common room or shared space, new security features have been added:

- A password to lock and prevent access to the board's settings.
- A setting to block access to the board's internal data from a PC.
- A setting to disable the use of a USB memory stick.
- A setting to disable the ability to print from the internal memory.
- The **Erase Reminder** feature, which reminds the user to erase any writing & drawing which may have been inadvertently left on the scrolled surface of the board.

PDF, JPG and PNG Support

PDF and JPG formats have been added to the previously supported PNG format. Now users have more options for the easy handling of image files for the purpose of printing, saving to a USB memory stick and saving to a PC.

Header/Footer Function

This feature automatically adds company logos and identifiers to the printed or saved documents. Doing so helps keep meeting records organized and extends the utility of the documents.

Integrated "PLUS TOOLBOX" software

All of the settings and operations of the board can be easily accessed when using a connected PC. Simple "Plug&Play" recognition of the board means that the PLUS TOOLBOX menu automatically pops up on the PC screen when the PC and board are connected via a USB cable. This is an improvement from the previous software which required the settings to be adjusted model by model.

Color Laser Printer Compatible

In addition to being compatible with a number of InkJet printers, the C-12 Series can now be used with the magicolor 1600W and 1680MF from Konica Minolta. The compact size, high performance and low color printing cost of the magicolor 1600W and 1680MF make either of these laser printers a perfect match for your PLUS C-12 CaptureBoard.

Enhanced Screen Surface

While maintaining the aspects of a projection screen, improvements have been made to the board's writing/erasing performance.

CaptureBoard™

Ideal for meetings in which a projected image is discussed.

A better meeting experience.

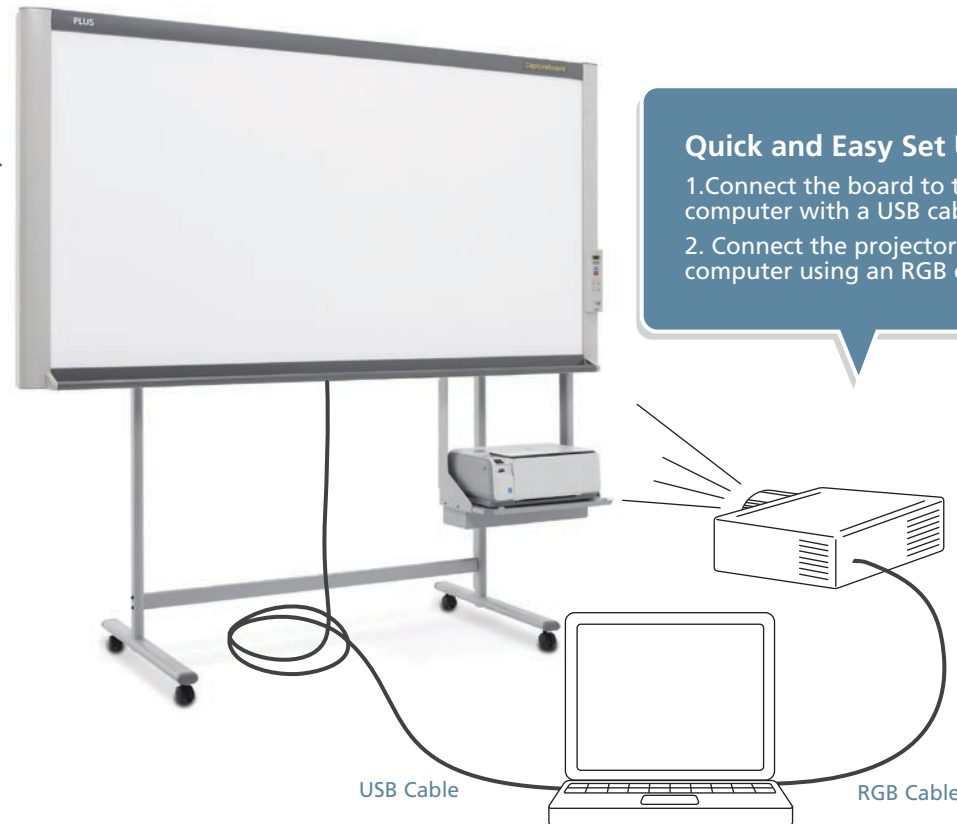

The PLUS CaptureBoard allows your meetings to be more dynamic, creative and productive. Meeting attendees can contribute ideas and provide input by adding their comments to the "writable" screen of the board. Combine and save all of the notes and comments along with the original projected image to your computer. Exact copies of the meeting notes can be easily stored or distributed as printed copies or via email.

Project & Write

The CaptureBoard's unique screen surface possesses the properties of both a projection screen and a dry-erase board.

Project an image of up to 60 inches. Use the supplied color markers to write directly on both the projected image and in the blank spaces on the board.

The matte surface allows for sharp projected images with minimal reflection or glare.

Quick and Easy Set Up

1. Connect the board to the computer with a USB cable.
2. Connect the projector to the computer using an RGB cable.

Capture & Save

The easy-to-use CaptureBoard software allows you to combine and save the projected image with the hand-written notes into a single digital file on your computer.

The simple four-button menu is intuitive and learning the software requires little training.

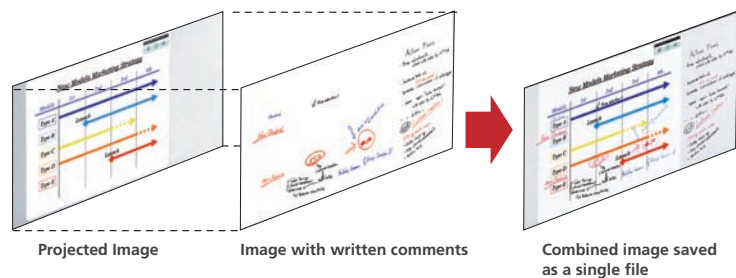

The combined image can be saved as a JPG, PNG or PDF file which can be easily printed in color, attached to an email or incorporated into office documents.

Software Menu

- Scan Board
- Select Corner Mark Color
- Scroll Sheet
- Board Settings

Software Overlay Method

Save as JPEG, PNG, or PDF

Usage.

1 Begin your meetings quickly.
Start up the CaptureBoard software to bring up the main menu at the top right of the projected image. Four small circles appear in the corners of the image. Trace each circle with one of the supplied markers. The circles aid the software with proper alignment.

2 Have a lively and dynamic discussion.
Using the supplied markers, write anywhere on the screen, including over the projected image. Everyone can contribute, resulting in a lively and productive meeting.

3 Combine and save the image and notes.
To save your work press the Scan Button. The screen will scroll to the left to scan the written comments and then send them to your computer. On your PC, the CaptureBoard software overlays the written comments with the projected image. The file can then be saved and printed. You can be confident knowing that everyone possesses exact copies of the presentation.

4 Modify and share the saved information.
It is easy to distribute the meeting notes to co-workers since everything is saved as a digital image file.
For example:
Send revised design plans to the production department; insert the meeting notes into office documents; or, simply email the day's work to anyone who was absent from the meeting.

Copyboard Functionality

When not used with a projected image, the CaptureBoard can be used as a copyboard.

Push Button Operation for printing your notes to paper or saving your work digitally. Surpasses the functionality of a chalkboard or whiteboard.

USB Memory Stick Port

Push a button to save the hand-written notes to a USB memory stick without ever connecting to a computer. Note: Images projected on the screen cannot be saved using this method.

On-Board Printer (Optional)

A USB port and a printer tray allow for the connection of a color printer.* With a connected printer, print the hand-written notes directly from the board. Note: images projected on the screen can not be printed using this method.

*See the Specifications and check with your dealer for current compatible printers.

PRINTERS compatible with: **M-12 & M-11 Series Copyboards and C-12 & C-11 Series CaptureBoards**

• Current known compatible HP InkJet Printers:

- Photosmart C4480 - (Requires latest Version of Firmware)
- Photosmart C4280 - (Requires latest Version of Firmware)
- Photosmart C4180
- Photosmart C3150
- Photosmart C3180
- Photosmart D5360 - (Printer will not fit the printer tray)
- Photosmart D5160 - (Printer will not fit the printer tray)
- Deskjet D2460 - (Requires latest Version of Firmware)
- Deskjet 5940
- Deskjet 5440
- Deskjet 6540
- Deskjet 6940
- Deskjet 6980
- Deskjet 6988
- Deskjet D5100 - (Requires latest Version of Firmware,
Check with Technical Support)

Note: Currently supports HP Printers with printer language PCL3e – *with some exceptions.*

• Current known compatible Lexmark InkJet Printers:

- InkJet Z2300
- InkJet Z645
- InkJet Z1300 (Requires latest version of firmware,)

Note: Lexmark printers currently compatible with Serial # for M11S – 11SRB6921258 or later, for M11-W 11WRB6920952 or later, For proper functionality purchase Black Cartridge separately. Consult Technical Support for assistance.

• Current known compatible Samsung Monochrome Laser Printers (SPL):

- ML-2010

• Current known compatible Dell Monochrome Laser Printers:

- Dell Laser 1110 (Monochrome) -
(Requires latest Version of Firmware, Check with Technical Support)
